Engineering Solutions for Warehouse & Industrial Operations

ELEI is a manufacturer and engineering partner for warehouse and industrial equipment. We design and deliver practical, high-quality solutions that help businesses build safer, more efficient and more productive operations.

Engineering Excellence

Practical, innovative designs based on real industrial needs.

Patent-Pending Solutions

Original designs with patent-pending technologies for greater value and reliability.

High Quality Manufacturing

Manufactured with strict quality control for durable and long-lasting performance.

Global Delivery

Reliable supply and support to customers worldwide.

Product Groups

- Storage & Access

- Boltless Rack
- Floor Trolley
- Manurack
- Pull-Out Unit
- Stillage Cage

- Workstations

- Welding Table
- Working / Assembly Table

ELEI

Pull-Out Unit

ELPO 70350

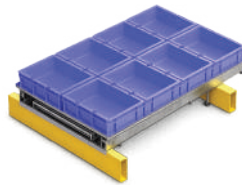

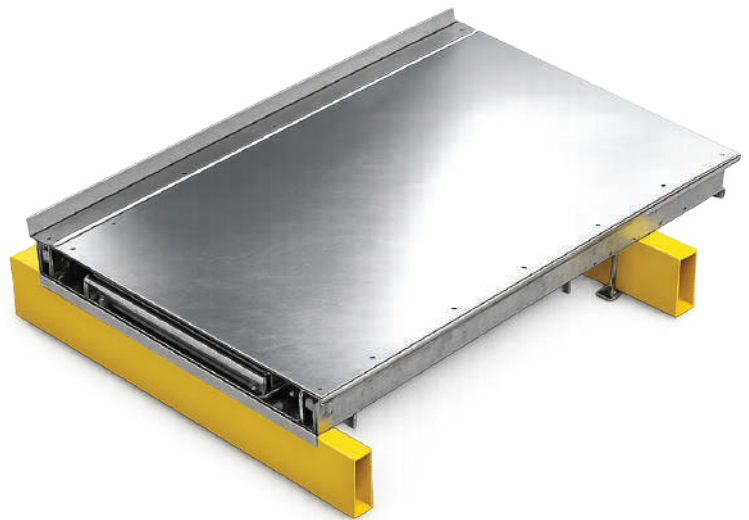

PALLET RACK SLIDING UNIT

MODEL RANGE

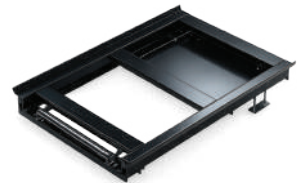

Capacity	70%	100%
350 kg	70350	100350
700 kg	70700	100700
1000 kg	70100	100100

UNIT DETAIL

LOAD HANDLING

FRAME DETAIL

Product Description

The ELPO 70350 is a sliding shelf unit for pallet racking. It brings stored goods forward for easier loading, unloading and picking.

Standard beam mounting with an optional floor-mounting configuration.

Technical ELPO 70350

- 350 kg at 70% extension
- 840 mm pull-out travel
- 820 × 1240 mm storage surface
- 826 mm overall width
- 100 mm above the beam
- 17 mm front / rear pallet stops
- Grip-operated position lock
- Colour upon request

Use Cases & Advantages

- Direct access to stored goods
- Faster picking and handling
- For warehouses, distribution and production facilities
- Fits 50–60 mm wide beams
- 990–1154 mm outside dimension across beams

Storage & Access Solutions

SMART STORAGE FOR A MORE PRODUCTIVE TOMORROW

Boltless Rack

QUICK. FLEXIBLE. MODULAR.

A modular rack with boltless clip connections for quick assembly and flexible storage.

250 kg /
shelf level

Boltless
assembly

Modular
design

Easy assembly • Configurable storage

Floor Trolley

MOVE. HANDLE. CONNECT.

A rigid steel trolley for moving materials within production and warehouse areas.

300–1000 kg
load options

Polyurethane
wheels

Custom
platform sizes

Optional MDF deck • Trolleys can be coupled

Manurack

STACK. TRANSPORT. SAVE SPACE.

A stackable, collapsible transport rack for storing and handling bulky or heavy loads.

500–3000 kg
load options

Stackable &
collapsible

Welded steel
construction

Galvanized / powder-coated • Custom branding

Stillage Cage

STORE. PROTECT. HANDLE.

A steel wire-mesh stillage for storing and handling industrial parts and materials.

500 kg
load capacity

Steel wiremesh
sides

Forklift-
compatible base

Welded steel construction • Industrial storage

Rigid Double Gate

Wire Mesh

Steel Container

A durable steel container for industrial storage and material handling. Wire mesh sides keep contents visible, while the drop gate provides convenient access.

The collapsible design reduces empty storage and transportation space.

Weight	Dimensions (mm)	Capacity
60 kg	876.3 × 876.3 × 863.6	1000 kg

- ☒ Powder coated
- ☒ Wire mesh visibility
- ☒ Double-gate access
- ☒ Stackable configuration

Collapsible Drop Gate

Wire Mesh

Container

A collapsible steel container with drop-gate access. Folds down when empty to reduce storage and transport space.

- ☒ Collapsible design
- ☒ Drop-gate access
- ☒ Visible, accessible contents

Weight	Dimensions (mm)	Capacity
72 kg	1028.7 × 876.3 × 812.8	1600 kg

Welding Table

PRECISION. FLEXIBILITY. REPEATABILITY.

A steel welding table with Ø16 mm fixture holes for precise positioning and clamping. Modular mounting points support a wide range of workpieces and fixture layouts.

Ø16 mm holes

For fixture setup

Modular fixturing

Flexible positioning

Nitrided surface

Surface-treated tabletop

±50 mm adjustment

Castors or levelling feet

TABLE OPTIONS

L × W × H (mm)	Thickness	Tabletop	Holes
2990 × 1490 × 750	10 mm	Steel	Ø16 mm
2400 × 1400 × 750	6 mm	Steel	Ø16 mm

Workbench

MODULAR BY DESIGN

An adaptable workbench for assembly, maintenance and production. Configure the tool panel, drawers and storage around the task.

Modular accessories

Perforated tool panel

500-750 kg static load

1800 × 750 × 900 mm

Powder-coated / galvanized finish

ACCESSORIZED CONFIGURATION

BASE CONFIGURATION

ENGINEERED TO SUPPORT. DESIGNED TO PROTECT.

Diagonal Brace

Reinforces upright frames and improves rack stability under load.

- ☒

Galvanized finish

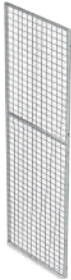

☐

Custom dimensions

☐

Frame reinforcement

Panel

A modular steel panel for partitions, enclosures and racking reinforcement.

- ☐

Profile / sheet frame options

☐

Custom dimensions

☒

Galvanized / powder coated

Pallet Support Profile

Supports pallets for safer, more stable positioning on racking systems.

- ☐

Load capacity options

☐

Custom dimensions

☒

Galvanized / painted finish

Protector

Shields rack uprights and columns from forklift and handling impacts.

- ☒

Thickness options

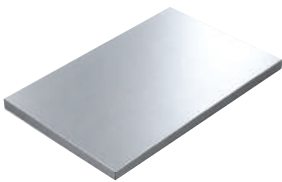

☐

Custom sizes and colors

☐

Impact protection

Shelf

A modular steel shelf deck for organised, high-density storage, adaptable to different shelving configurations.

- ☐

Custom dimensions

☒

Galvanized / powder coated

☐

Modular configurations
